Career Center

The U-tad Career Center is an exclusive access platform for U-tad students and alumni allowing you to receive all our employment and internship offers. You can also request access to events or directly schedule personal meetings with our advisers.

The Career Center allows you to stay in touch with companies looking for talent. And vice versa. As a student or alumnus, you can directly contact the companies you are most interested in, communicate with them and send them all the information you want them to take into account in their selection processes.

How to access the Career Center?

To access the Career Center you must register with your U-tad email and define your profile: the qualification you are studying for, the year when you will graduate, search preferences, event alerts...

Businesses will not have access to your profile unless you sign up for an offer, so even if you are new to university, you should sign up as the activities organised by the Professional Development Service are communicated via the platform, giving you access to a host of extremely useful resources.

Once you have your CV ready, upload it and the Professional Development Service will review it and give you advice on how to improve it if necessary. Remember that when studying in the art area, if companies are to select you it is essential to have a good portfolio and/or reel.
